EverSpeech Epilog

Product Description

EverSpeech Epilog adds powerful speech recognition and synthesis capabilities to Web applications. Replace your paper-based forms and upgrade standard Web applications with fast, efficient, speech-enabled interfaces.

Features

- Navigate pages, fill in forms with speech
- Highest accuracy
- Works in noisy environments
- Improves productivity with speed and accuracy
- Reduces errors by capturing data at the source
- Increases functionality and usability
- Frees up one or both hands
- Speech enables standard Web pages for effective speech interaction
- EverSpeech style sheets and guidelines enhance usability
- EverSpeech markup optimizes speed and accuracy
- Supports custom grammars for application-specific input
- Supports data validation
- Integrates with other input modalities such as pen, touch, mouse, and keyboard
- Integrates with any back-end Web technology such as JSP, ASP, and PHP
- Integrates with any database such as MySQL, Microsoft SQL, and Oracle
- Integrates with Internet Explorer as an add-on
- Use standard Web-design tools
- Ideal for Tablets and other mobile PC devices

EverSpeech Transcriber

Product Description

EverSpeech Transcriber adds integrated transcription capabilities to Web applications. Talk into any text area on any Web page. Audio and text are saved when and where you need it, associated with your application and database.

Features

- Converts speech to text for comment fields and other free-form input
- Allows focus on task expertise rather than text entry
- “Fire and forget” accuracy
- Works in noisy environments
- Integrates with standard Web pages
- No design changes required
- A cloud-based solution
- Patent-pending technology
- Complements *EverSpeech Epilog*
- Simple subscription-based pricing
- Option for audio-only mode

EverSpeech Consulting Services

Product Description
